PROFESSIONAL SUMMARY

Highly motivated Computer Science student (6th Semester) with a strong foundation in Object-Oriented Programming (OOP) and Data Structures & Algorithms (DSA). Passionate about full-stack web and mobile application development. Proven ability to learn quickly, tackle complex problems, and build dynamic, user-friendly solutions spanning Java, C++, and modern web technologies. Seeking opportunities to apply software engineering principles to real-world software products.

TECHNICAL SKILLS

Programming Languages:	Java, C++, C#, JavaScript, HTML, CSS
Tools & Frameworks:	Android Studio, Node.js (Familiar), React (Familiar), Git, GitHub
Core Concepts:	Object-Oriented Programming, Data Structures & Algorithms, UI/UX Design, Relational Databases

EDUCATION

BS Computer Science (Currently in 6th Semester) — 2023 – 2027

KIPS College Kasur (Affiliated with GCUF)

- Immersed in comprehensive CS coursework including advanced algorithms, system architecture, and software engineering.

Intermediate (General Science) — Graduated: 2023

Concordia College for Boys, Kasur

- Passed with 746/1100 (B Grade), building a strong analytical and mathematical foundation.

Matriculation (Science) — Graduated: 2021

Sadiq Memorial High School for Boys, Khudian Khas

- Passed with Distinction: 1088/1100 (A+ Grade).

SELECTED PROJECTS

Innocent Gangsters (Web Application) — View on GitHub

- Designed and developed a dynamic portfolio-style web application featuring multiple interactive member profiles.
- Implemented a seamless navigation system routing users from a general showcase page to dedicated, data-rich personal pages for each member.
- Optimized DOM manipulation and asset rendering utilizing robust JavaScript patterns and modular CSS.

SaaS Products: Resume Builder & Portfolio Generator

Resume | Portfolio

- Engineered distinct SaaS tools enabling users to generate professional resumes and dynamic portfolio websites instantly.
- Architected intuitive front-end interfaces prioritizing User Experience and responsive design.
- Integrated real-time preview mechanisms allowing instant feedback on configuration and content changes.

Media Player (Android Application)

View on GitHub

- Developed a functional Android media player application utilizing Java and Android Studio.
- Successfully implemented core Android components including Activities, Intents, and complex UI layouts.
- Handled media playback state management, ensuring smooth user interactions and error handling.

Core OOP & DSA Implementations

ListView | Queue

- Created native implementations of fundamental data structures such as Queues and advanced dynamic ListViews.
- Demonstrated proficiency in C++ and Java memory management, class design, and algorithmic efficiency.
